Our mission is to create essential sports products that support everyone, every athlete, regardless of his or her level, in experiencing moments of glory.

VISION - WHAT WE AIM FOR

Our vision is to become the first brand in the athlete's mind when it comes to moments of glory.

VALUES - WHAT WE BELIEVE IN

Product is king

Stanno aims to transmit the love of sports through products that meet the Stanno design philosophy: Function. Form. Attitude. In that exact order. For Stanno, product is king. It is the specialty of Stanno to provide extensive collections of interest to every athlete, on the one hand, and, on the other, to develop tailored, high-tech products for specific groups of athletes. The brand is dedicated to create quality every day, driven by a firm belief in the winning connection of versatility and innovation.

Sport is our passion

Sport is in the core of our DNA. The love of sports is reflected in everything we do, from our design philosophy to our development and marketing. It's our inspiration domain. In sports it is all about momentum. The tipping point where the hard work comes together, the powerful dynamic around a defining moment.

RKC WAALWIJK

© Pro Shots / Niels Boersema

Stanno has been the official clothing partner of RKC Waalwijk since 2016. The club from Noord-Brabant was the first professional football club in the Netherlands to play wearing Stanno, and as of the '19/'20 season, also the first Eredivisie club in Stanno team wear.

Stanno develops a unique home uniform in traditional yellow-blue for RKC each year. For the '20/'21 season, a distinctive away shirt was also selected: a black shirt with mint green details, featuring a black marble design. Bold, but received with great enthusiasm by the fans!

FOAM MATERIAL

 <p>HYPER FOAM PLUS</p>	 <p>HYPER FOAM</p>	 <p>AQUA FOAM</p>	 <p>SUPER SOFT PROFI FOAM</p>	 <p>SOFT FOAM</p>
<p>Hyper Foam Plus is an ultra-soft and even thicker foam than Hyper Foam. This ensures an even better grip in both dry and wet weather conditions. Its absorbency has been considerably improved, which ensures optimum impact reduction and even better ball control. An additional advantage of Hyper Foam Plus is the improved, longer lifespan.</p>	<p>Hyper Foam ensures optimal grip in both dry and wet weather conditions, thanks to the foam's absorbent properties. Hyper Foam guarantees optimal comfort and increases ball control thanks to its excellent impact reduction.</p>	<p>Aqua Foam offers optimal grip in wet conditions. The soft and more open foam structure takes up water, which - in comparison to other types of foam - provides a 25% better grip. Additionally the Aqua Foam gloves contain an extra shock-absorbing function to reduce the impact of hard shots. The changing needs of professional keepers require that the characteristics and quality of the foam continually develop.</p>	<p>Super Soft Profi Foam has excellent properties for grip in both dry and wet conditions, and it also offers excellent cushioning. The use of the latest materials ensures durability and optimal comfort.</p>	<p>Soft Foam provides a reliable grip and excellent cushioning. Soft Foam ensures maximum ball control and optimal comfort.</p>

FOAM PROPERTIES

	<p>GRIP DURING DRY WEATHER CONDITIONS The adhesive properties of the foam are decisive for an optimal grip and the best performance. The weather is a big influence on the properties and performances of the foam material. Playing during dry weather requires specific foam components for optimal results.</p>
	<p>GRIP DURING WET WEATHER CONDITIONS Moisture, rain and wet conditions affect the grip and require additional components for a better grip. A softer and more open foam structure absorbs the water and is very suitable for wet weather conditions.</p>
	<p>CUSHIONING As well as grip, cushioning is an important factor in determining the most suitable goalkeeper gloves. The softer and thicker the foam, the better the impact of the ball can be absorbed. Also the thickness of the basic material of the gloves determines the amount of cushioning.</p>
	<p>ABRASION RESISTANCE Foam is a very soft material that needs special treatment. Regular ball contact leads to wear and tear of the foam. The degree of wear is determined by the surface structure and the density of the foam material. A more coarse and closed foam structure will lead to less wear.</p>

 **Finger protection.** Firm, flexible strips on the upper side of the fingers provide good protection against injuries in contact with the ball. The flexibility of the strips guarantees that suppleness remains guaranteed while throwing, punching and catching the ball.

 **Rubber patch.** Gloves for artificial grass and other hard surfaces are provided with a rubber patch on the inside of the hand. The patch is placed on the part of the glove that most often comes into contact with the ground. This improves the wear resistance of the glove.

 **OPF design.** The supple, lightweight material of the wrist strap runs over the upper hand and provides an even better connection around the skin. The OPF design also results in an extra light glove.

GOALKEEPERS GLOVES

One of the main features of goalkeeper gloves is the way in which the gloves are stitched. This determines the ball control, grip and comfort.

ROLLFINGER-MODEL

With the **rollfinger system**, the finger is completely surrounded by foam, without stitching. The magnification of the grip surface that is created in this way, allows for optimum grip on the ball.

These sizes are only to be used as a guide. Careful attention should be paid to garment with a "Slim Fit" icon which are obviously a smaller, slimmer fitting.

Sampling is strongly advised if you are unsure about sizes. We cannot accept any liability or return of goods, if garments are decorated and then found to be unsuitable.

On photographic reproduction and print some colour changes may occur between pictures and original products. We reserve the right to make product/technical changes (in design, colour, function and material), which we feel, will make for improvement of the product. We will not accept any responsibility for printing errors in the catalogue! All Stanno products are suitable for printing, front or back. Garment care: Stanno products are made to the highest standards and are subject to strict quality control procedures. Garments however can discolour due to substances such as mud and grass, liniment or oil, and of course perspiration, all of which may not be fully removable by washing. The extent of discolouration can be greatly reduced by following a few simple procedures. Soaking and/or washing of the garment in water and detergent as soon as possible after use can reduce discolouration, using at least the same volume of water as the garment being treated. Always follow detergent manufacturers instructions, especially those

intended to tackle heavy stains and avoid products containing bleach. Stanno International cannot accept any liability for discolouration or damage to garments resulting from staining caused by elements foreign to the materials used in manufacture.

All catalogue prices are recommended prices inclusive of VAT. The copying of products, in whatever form that may take, is forbidden without the prior written consent of Stanno International. Stanno International reserves the right to modify product specifications and prices at any given time.

Please note all time lines listed are purely for guidance and we reserve the right to make changes to these. It also applies that in the last year of the stated period, we can no longer guarantee complete size runs.
